

STYRENE-BUTADIENE-STYRENE MULTIBLOCK COPOLYMERS

(SBS)T161B、T6302

Manufacturer

Dushanzi Petrochemical Company

Applications

SBS has good low temperature and processing property. It is mainly used in 4 fields: rubber products, resin modifier, adhesives and asphalt modifier. SBS T161B and T6302 are mainly used in asphalt modifier.

Package, storage and transportation:

The product is packed in composite paper-plastic bags or polypropylene woven bags lined with polyethylene film. The net unit weight is 15kg . It should be stored in cool, clean, dry and well-ventilated warehouse. Outdoor storage and direct sunlight should be prevented. Protect from sun, rain, damage and contamination during transportation.

Specification: Q/SY DS067-2010

Item	The quality index		Test method
	T161B	T6302	
Volatiles, % ≤	1.0	1.0	Q/SY DS 0523
Total-styrene, %(m /m)	27.0-33.0	29.0-33.0	Q/SY DS 0520
